

SURVEY ON STACK OVERFLOW DEVELOPER DATA

Merryl Tuscano

02-03-2024

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Dataset Overview and Introduction
- Methodology
 - Data Cleaning/ Wrangling
 - EDA
 - Data Visualization
- Dashboard and Results
- Results discussion and Findings
- Conclusion

INTRODUCTION

- The Stack Overflow Developer Survey is an annual survey conducted by Stack Overflow, a popular online community for developers
- This project gathers insights into various aspects of the software development industry, including programming languages, frameworks, tools, technologies, job satisfaction, and demographics.
- A dashboard showcasing various patterns and trends such as:
 - Programming Language Popularity
 - Future Technology Trends
 - Developer Demographics by Age/Gender/Education Level.

METHODOLOGY

- Data Collection
 - Using APIs
 - Web Scrapping
- Data wrangling
 - Finding and Removing Duplicates
 - Normalizing Data
- Exploratory Data analysis
 - Data Distribution and Handling Outliers
 - Correlation
- Data Visualization
- Building Dashboards

PROGRAMMING LANGUAGE TRENDS

Top 10 Languages

Top 10 Languages This Year

Top 10 languages Next year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Javascript is Top Worked on and Desired Language
- C++ not one of Top 10 Next years desired Languages
- Number of respondents has decreased

Implications

- High Demand for Javascript Developers
- Increase maintenance challenge for C++ based platforms.
- Reduced Career opportunities, Dependency on technology.

DATABASE TRENDS

Top 10 Databases This Year

Top 10 Databases Next year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- MySQL is the most worked on
- Demand for PostgreSQL increased
- Oracle not in the top 10 desired list of next year.

Implications

- Demand for MySQL will increase
- More job opportunities for people skilled with PostgreSQL
- Challenges for Oracles ecosystem.

Master's degree (MA, MS, M.Eng., ... Other doctoral degree (Ph.D, Ed.D., ... Primary/elementary school
Professional degree (JD, MD, etc.) Secondary school (e.g. American ... Some college/university study wit...

DISCUSSION

- There isn't a massive shift in the current technology trend as compared to future.
- The amount of respondents wanting to learn various programming languages has decreased.
- Maximum number of respondents are men – 93%
- Maximum respondents belong to the age group of 20-30 years of age.

OVERALL FINDINGS & IMPLICATIONS

Findings

- Number of Men is Greater than women
- Youth are more Comfortable with programming languages
- Not a massive shift in current vs Future technology trends.

Implications

- Women not being able to be as technology independent and friendly as men
- Early adoption of technology and educational/career opportunities.

CONCLUSION

- Stack Overflow Developer Survey provides valuable insights into the current trends, preferences, and challenges within the global developer community.
- Key takeaways from the survey include the continued dominance of JavaScript as the most popular programming language
- The survey highlights the growing importance of remote work, diversity, and inclusion initiatives within the tech industry.
